

## Playground amenities update

Next time you are in the area of the village hall look over to the Playground. The planned work upgrading it was completed in December 2016. The playground now has new fencing, renewed rubber flooring, a repaired play unit and an additional play item in the form of a nest swing. The latter extends the range of children who can use the playground as it is accessible for disabled and younger children. Many thanks to those who gave generously to fund the work alongside funds provided by the Parish Council.
