

Public Health Video & Report for 2020.

Published July 2021

“Not on mute: Our response to COVID-19 in Cheshire West and Chester (PART ONE)”

We are pleased to inform you that we launched the 2020 Public Health Annual Report (PHAR) at the CW&C COVID-19 Outbreak Board.

The response so far has been overwhelmingly positive.

Please can you promote the film as widely as possible.

We also want to track where and how promotion has taken place. If you could please send me across brief details (as per attached) that would be much appreciated!

The film is now available to watch on our Council website: cheshirewestandchester.gov.uk/CovidResponse

The accompanying written report will also be available very shortly via our Public Health Webpage: cheshirewestandchester.gov.uk/PublicHealth

This contains 5 recommendations relating to the following:

- Our local health protection response
- Support for our residents.
- COVID-19 Vaccination Programme.
- Enhanced Data and Intelligence
- Understanding of the Impact of COVID-19

The PHAR will act as part of our local legacy for current and future residents.

Please share far and wide!
